3. The stocking and shoe factories employed about 1,000 persons each in the summer of 1952. They had a common designing team consisting of six persons who were headed by (fnu) \$7.000000A.

4. Both factories were unfavorably located in a narrow basin, a fact which precluded the possibility of expansion or the construction of a railroad spur, so that all transport had to be by trucks.
